

G-2 PERIODIC REPORT

CONFIDENTIAL

From: 1800I, 22 Oct 1945
To: 1800I, 23 Oct 1945
Fukuoka Occupation Force
Fukuoka, Japan (46.95-68.45)
1800I, 23 Oct 1945

No. 23

Map: AMS L571, Central Japan, 1:250,000.

A. Demobilization and Disarmament.

1. Japanese Units Hitherto Unreported: None.
2. Japanese Military Units Demobilized and Disarmed During Period: None.
3. General Attitude of Military and Semi-Military Units: No change.

4. Location and Description of Examined Equipment and Dumps:

TOBATA WATER WORKS (1387-1205): The maximum production of this works is 12000 cubic meters daily. This serves 36000 of the city's 60000 population. The equipment is good and of an American make.

ASAHI GLASS CO. (1387-1205) has been converted to the MITSUBISHI chemical industry. War time employees numbered 3500 while at present they number 3000. The 500 were college and high school students and were laid off because of a drop in production. Present products made are: plate glass, soda ash, caustic soda, and sodium bicarbonate.

5. Order of Battle: None.

B. Intelligence Objectives or "Targets".

1. Location and Description of Intelligence Objectives Examined During Period:

KNOU KOKU MIN KINRO Army Training School (1355.4-1197.5): Lt. Gen. E. HIRAMATSO and Maj. Gen. T. ISHEMANU, both retired, are in charge. At present the school is not in operation, but plans are being formulated to re-open about 1 Nov. 1945. The school was built about July 1943, and was financed equally by the government and an Association for Occupation. This Association formed by private concerns, industrialists and philanthropists, is to help train young men in commercial trades. Its home office is in TOKYO and it has branch offices in NAGASAKI, FUKUOKA, and other large cities. The FUKUOKA Branch Office is located in a building to the rear of the City Hall. Pupils are recruited from small villages and farms, registered, sent to school for a 2 or 3 week training period and then sent to a job with some large concern. The school records list all pupils since its organization. At the present time an office staff occupies the Administration Building in the school area. A staff of 12 instructors is available for the planned school re-opening. The school has its records complete and ready for

CONFIDENTIAL 190

CONFIDENTIAL

inspection at any time. The persons interviewed were cooperative. There were 2 locked rooms which proved to be empty and the safe contained records of previous students at the school.

2. Location and Description of Intelligence Objectives Not Yet Under Force Control:

Administrative, public utility and military installations other than previously reported.

C. Counterintelligence.

1. Persons Apprehended or Interned: None.
2. Suspects: None.
3. Subversive Activities: None reported.
4. Unfriendly Organizations: None reported.
5. General: 3 Communist political agitators were interviewed and one stated that there are about 200 Communist sympathizers in OSAKA. This informant was a member of the RODO KUMIAI (Labor Union) and is employed in a coal mine for 56 Yen a month. Another of those interviewed stated that the last time he was questioned by the police was just subsequent to the Russian declaration of war on JAPAN. He was asked whether or not he would fight for JAPAN against RUSSIA and claimed that he answered in the affirmative. This informant was active in the PROLETARIA BUNKA KAGAKU, which, he said, was controlled from TOKYO and believed that KURAHARA, Kareto was the head of the organization. He stated that the main anti-democratic forces in JAPAN are the TOKKO and the HOGO KANSATSU SHO. It was his belief that Communism will now spread in JAPAN. One statement may be indicative of Communist thought in JAPAN at the present time: "Right now the American system is best for JAPAN, and then later the SOVIET system may be established."

D. Civilian Population:

1670 civilians arrived HAKATA 22 Oct. having left FUSAN 21 Oct. on the UNZEN MARU. 976 of these went to HONSHU, 568 to KYUSHU, 108 to SHIKOKU. 18 went as patients to SAISEIKAI Hospital. 9085 civilians arrived HAKATA 21 Oct. having left FUSAN 21 Oct. on the TOKUJU MARU and SC-60. 1677 of these went to HONSHU, 1396 to KYUSHU and 12 to SHIKOKU. On 22 Oct. 4027 Koreans were awaiting transportation home. 2985 arrived that day and 3880 left on the TOKUJU MARU, MAMIYA MARU and TANYU MARU. 14106 were waiting at SHIMONOSEKI on 22 Oct. 467 arrived that day and 1300 left on the KOAN MARU. 700 more left for other undetermined ports of embarkation.

FUKUOKA BASE COMMAND
FUKUOKA, JAPAN

25 November, 1945.

Annex DOG to FOF-FBC Operations Report

G-3 Report

Map: Island of KYUSHU; A-AMS; 1:25,000; FUKUOKA Area.

1. GENERAL:- This report covers the operational activities of the FUKUOKA Occupation Force (FOF) from 1800, 27 September, to 0800, 24 October, and the FUKUOKA Base Command (FBC) from 0800 24 October, to 25 November. Accurate times and dates of troop movements, important occurrences, opening and closing of command posts and similar events may be determined by reference to Appendix 1, which is a copy of all daily G-3 Operations Reports.
2. ESTABLISHMENT OF FOF:- The FOF was formed at 1800, 27 September, in accordance with V Amphibious Corps Operation Order Number 41-45. Forces were established in the FUKUOKA Area by overland rail and motor movement on 30 September and 1 October. BLT 128 opened its CP at Kashii Station (73.5-49.5) at 1500 on 30 September. The FOF CP opened at East Park (46.9-68.4) in FUKUOKA at 0830 on 1 October.
3. INITIAL PATROLLING:- Due to the extremely large area to be covered by the comparatively small force, extensive use was made of motorized patrols to accomplish the missions assigned. Beginning 2 October BLT 128 dispatched jeep patrols consisting of one officer, 2 enlisted and one Japanese civilian guide-interpreter throughout the entire FOF Zone of Responsibility. The mission assigned these patrols included the location and report on condition of all possible billeting facilities in the Zone; location of Japanese military and naval stores, equipment, supplies and materiel along with estimate on time required to inventory same; location of storage areas for our supplies as well as centralization points for Japanese equipment; report on condition of roads, bridges and their capability to accomodate heavy military traffic; investigation of intelligence targets; report on cooperation received from and

CONFIDENTIAL

ANNEX DOG TO FOF-FBC OPERATIONS REPORT - G-3 Report.

attitude of Japanese military and civilian personnel. From these initial patrols this Headquarters readily received an abundance of valuable information relative to conditions existing throughout the assigned zone.

4. OCCUPATION OF SHIMONOSEKI AREA:- Co K, 28th Marines, arrived at Hakata Station, FUKUOKA, at 1110 on 4 October. FOF at that time assumed operational control and dispatched the Company to SHIMONOSEKI at 1132. Upon arrival SHIMONOSEKI at 1338 the SHIMONOSEKI Occupation Group was established in that area with their CP located at Headquarters, 74th Depot Regiment in SHIMONOSEKI. They immediately initiated action to maintain surveillance over and supervise Japanese military and civilian population's compliance with prescribed terms of surrender.
5. OCCUPATION OF MOJI AREA:- RCT-28 was completely attached to FOF and moved to the FUKUOKA Area via overland rail and motor movement on 5 and 6 October, completing the move at 1715 on 6 October. RCT-28 CP opened at East Park (46.9-68.4) in FUKUOKA at 1330 on 6 October. Co I, 28th Marines, was moved to MOJI via rail on 6 October departing FUKUOKA at 1250 and arriving MOJI 1430. The balance of BLT 328 was moved to MOJI via road and rail on 10 October, closing into MOJI at 1245. This BLT was then designated as the SHIMONOSEKI-MOJI Occupation Group with its CP located at the MOJI Club in MOJI.
6. SURVEILLANCE:- All FOF units maintained surveillance within their assigned areas by the continual and extensive use of motorized patrols. On installations and areas deemed inadequately guarded, and so as to prevent spreading our troops over a large area, the Japanese were ordered to post additional civilian police as guards and sentries. Daily patrols were dispatched to inspect and determine the alertness and efficiency of the Japanese guards.
7. AIR COURIER SERVICE:- Two OY-1 type aircraft from MOG-1 were assigned duty with this Headquarters. Commencing 6 October daily air courier service for both passengers and mail was put into effect between FUKUOKA, SASEBO and SHIMONOSEKI. This service was later extended to include MOJI and YAMAGUCHI.

CONFIDENTIAL

ANNEX DOG TO FOF-FBC OPERATIONS REPORT - G-3 Report

8. ESTABLISHMENT OF YAMAGUCHI DETACHMENT:- Occupational activities were extended on 11 October with the establishment of forces in the City of YAMAGUCHI, capital of YAMAGUCHI Ken. The detachment, consisting of 50 officers and men commanded by a field officer, arrived via rail movement from MOJI at 1735. Command Post of the YAMAGUCHI Detachment was established in the MATSUDAY Hotel. The Commanding Officer represented the Commanding General in the conduct of occupational matters with the YAMAGUCHI Ken military and civilian authorities including problems of demobilization, return of Korean Nationals and repatriation of Japanese. Insofar as the size and organization of the detachment would allow, occupational missions including patrolling, surveillance and intelligence target investigations were carried out.
9. PRISON INVESTIGATIONS:- In special operations beginning at 1600 on 15 October one investigating patrol was sent to every prison and place of detention in the FOF Zone of Responsibility. In YAMAGUCHI Ken prisons located at IWAKUNI, TOKUYAMA, YAMAGUCHI City and SHIMONOSEKI were entered and investigated by the YAMAGUCHI Detachment. RCT-28 investigated IIZUKA Branch Prison and the HOJYO and NAMAZNDA Coal Mine working places in their assigned zone. The FOF Provost Marshal investigated FUKUOKA and DOTEMACHI prisons in the FUKUOKA Area. The WAKAMATSU and KOKURA Branch Prisons were investigated by the SHIMONOSEKI-MOJI Occupation Group. Patrol leaders were instructed to determine Japanese compliance with the SCAP Directive dated 4 October insofar as release of persons imprisoned for thought, speech, religion or political belief was concerned. CIC screened all questionable or doubtful cases. Investigations throughout the Zone were completed by 24 October except for FUKUOKA Prison. In all instances it was determined that this portion of the directive had been fully complied with. Lists of prisoners by name, released in accordance with terms of the directive, were obtained and forwarded to higher authority.

CONFIDENTIAL

ANNEX DOG TO FOF-FBC OPERATIONS REPORT - G-3 Report

10. OCCUPATION OF SENZAKI:- SENZAKI became the principal repatriation port in YAMAGUCHI Ken for both incoming Japanese and returning Koreans. The CO, YAMAGUCHI Detachment, accompanied by Ken Officials, made an inspection trip to SENZAKI on 14 October to obtain information relative to Japanese and Korean repatriation activities in that port. He reported the immediate necessity for establishing a small force there to supervise entry of Japanese Nationals and to better control the return of Korean Nationals. Because of damage to road and rail transportation facilities, caused by storms in Western HONSHU, a detachment was not established in SENZAKI until 19 October. At 1600 on that date a detail of 2 officers and 40 men from Co D, 3rd MP Bn (Prov) arrived there via rail from SHIMONOSEKI, and began supervision of repatriation.
11. RELIEF OF FOF BY 32ND INFANTRY DIVISION:- The 32nd InfDiv began entry into the FOF Zone of Responsibility on 15 October with the arrival in the SHIMONOSEKI Area of elements of the 128th Infantry via overland rail and road movements from SASEBO. The 1st Bn, 128th Infantry, cleared into SHIMONOSEKI at 2333 on 16 October and the 2nd Bn was established in that city by 2320 on 18 October. 3rd Bn and Regimental Headquarters, 128th Infantry, was completely established in YAMAGUCHI City by 2030 on 18 October. At 0900 on 19 October all units of the FOF in YAMAGUCHI Ken were relieved by the 128th Infantry and assigned 32nd Inf Div service units. The 129th FA arrived at MOJI on 19 October at 2400 and relieved the MOJI Occupation Group at 1800, 21 October. The 3rd Bn, 28th Marines then returned via train departing MOJI at 0830 on 22 October for SASEBO, where it was reattached to the 5thMarDiv. The CP of the 32nd InfDiv opened in FUKUOKA on 22 October. At 0800 on 24 October by V Amphibious Corps order the FOF within its Zone of Responsibility was relieved of occupational control by the 32nd InfDiv. At that same time the FOF was disbanded.
12. ESTABLISHMENT OF FBC:- With the disbandment of the FOF the FUKUOKA Base Command was established at 0800 on 24 October in accordance with V Amphibious Corps Operation Order No. 47-45 and organized in accordance with the task organization indicated in FBC Operation Order No. 1-45 (See Annex ABLE).

CONFIDENTIAL

ANNEX DOG TO FOF-FBC OPERATIONS REPORT - G-3 Report

13. BASE DEVELOPMENT:- Base development missions commenced immediately. At SAITOSAKI (40.7-73.1) development and improvement of an LST-LSM beaching area was continued and facilities sufficient in size to allow ten to fourteen LST's and LSM's to beach and unload simultaneously was completed on 15 November. The 1688th Engr Bn constructed a road running parallel to this beach area to facilitate unloading and also improved existing beach exits.

The FUKUOKA Port Director came under the operational control of the FBC at 0800 on 26 October. Headquarters were established in the Mitsui Shipping Agency Building (45.7-68.1). Control of all Japanese shipping in FUKUOKA Harbor was assumed by the Port Director. Necessary facilities were established and arrangements completed to handle and control United States shipping upon the opening of FUKUOKA Harbor.

Hospitals and medical units began arriving in this area on 25 October. The 309th Gen Hosp with the 24th Mal Surv Det and 11th Gen Disp attached was established in the Postal Savings Bldg (44.1-66.6) in FUKUOKA and opened on 19 November. The 122nd Sta Hosp with the 13th Gen Hosp 123rd Sta Hosp and 25th Evac Hosp attached was established in the Mitsui Bldg in MOJI.

Units of the 327th and 693rd QM Bns were concentrated in the Kashi Warehouse Area (49.5-73.5) near FUKUOKA. The 209th Ord Bn was located at the ZASS Foundry (53.1-61.1) near FUKUOKA.

All attached service units performed supply and administrative functions in accordance with their capabilities.

On 25 November the FBC was disbanded and its duties assumed by the 32nd InfDiv.

3. Our Operations for the Period:

a. Headquarters.

Force Headquarters opened at East Park, FUKUOKA (46.9-68.4) at 0830 1 October. A conference was held by the Commanding General to acquaint the staff with further details of the Force mission, in this area. At 1103 a detail of 2 officers and 12 men were ordered to SHIMONOSEKI on a special mission. At 1515 1 officer and 8 men were ordered to MOJI on a similar special mission. The 5th ASCO arrived by train at 1600, and motor at 1430, and was billeted in the area occupied by BLT 128 at Kashii Station (73.5-49.5). The 3rd Plat, Co C, 3rd MP Bn, was detached from BLT 128, and reported to Headquarters, FUKUOKA Occupation Force, at 0930.

CONFIDENTIAL

APPENDIX NUMBER 1 TO ANNEX DOG TO FOF-FBC OPERATIONS REPORT

b. BLT 128.

At 1415 1 officer and 1 man were ordered to visit HAKATA S.S., the proposed new billeting area, and, if time permitted today, the airfields, for the purpose of estimating the number of men and length of time required to complete an inventory of Jan material in those places. They were also instructed to note any possible billeting areas in the places visited, and report on their suitability. The BLT 128 continued local surveillance in the town of FUKUOKA. The Det. H&S Co., 98th Marines; C Co, 5th Med. Bn, and Hq Co, 128 arrived in FUKUOKA by train at 1600, and were billeted with LT 128 at Kashi Station (73.5-49.5). The Det. 116th NCB has not yet reported to this Headquarters.

3. Our Operations for the Period:

a. Headquarters.

Seven Military Police posts and two motorized patrols were set up in the FUKUOKA city area. A squad of nine men was detailed to work with the CIC Det.

Fifteen Inventory Teams, each consisting of an NCO and three men were formed. Three sets of five teams each were put into three inventory groups, each under an officer. All the personnel were from the 5th ASCO. This Headquarters received a detailed account of the facilities available and work to be done at HAKATA Seaplane Station and GONNOSU Airport from the patrol sent out. Advance elements of the 5th Fighter Command arrived at ITAZUKE Airport. It is their intention to establish an air base there. This Headquarters passed information of Japanese troop movements from Korea to 16th Army Headquarters in this City.

An advance section of the SHIMONOSEKI group led by Major Rolph reported to this Headquarters at 1730, and were ordered to remain here for the night and proceed in the morning by train at 0644.

b. BLT 1/28

BLT dispatched six motorized patrols at about 1200. These patrols consisted of one officer, one Intelligence man, and one interpreter. The mission of these patrols was to determine the number, size, location, state of repair, and necessary facilities of all practicable billeting areas and buildings within their zones. They were also to locate all Japanese military and Naval stores and estimate the number of men and amount of time required to inventory material and move it to central locations. The patrols were under command of the following officers:

Patrol #1	Hakata S.S.	2ndLt. T.W. Collier
Patrol #2	Wajero to the Tatora Gawa	2ndLt. E.M. Stone

MOJI area. Major Winstead was dispatched at 0700 via road to MOJI to report on billeting facilities in that city. At 1000 this headquarters passed information concerning Japanese troop movements from FUSAN, to Major Enatsu representative of Japanese Army Headquarters here. Japanese authorities were ordered to place a guard of civil police at ITAZUKE Airfield to supplement the reduced Japanese military guard there.

b. BLT 1/28.

BLT dispatched five (5) motorized patrols about 0930. The patrols consisted of one (1) officer, two (2) enlisted men and one (1) interpreter. The mission of these patrols was to reconnoiter beach areas in search of suitable landing areas for LSM's and LST's, and to reconnoiter Intelligence Targets in the zones of the respective patrols. The patrols were under the command of the following officers:

Patrol #1	Reconnaissance of beach areas and Intelligence Targets from coordinates (49.3-74.8) working north and west around Hakata Bay to coordinates (37.0-74.9).	2ndLt. V.L. Pederson
-----------	--	----------------------

3. Our Operations for the Period:

a. Headquarters.

This Headquarters assumed control of the SHIMONOSEKI Occupation Group at 1110 when it arrived FUKUOKA by train, and dispatched it via rail at 1132 and arrived SHIMONOSEKI 1338. Patrols were established to place surveillance over Japanese guarding installations not yet taken over by us, and also established a radio jeep patrol in the FUKUOKA City Area. This Headquarters forwarded to CG VAC reports on the LSM and LST beaches made by the 5201st Engr. Brigade as well as reports on the patrol activities of BLT 128. The advance party of the 32nd Infantry Division, consisting of five (5) officers and two (2) enlisted arrived by rail at 1110 and motor at 1430, and opened a CP at this Headquarters. Surveillance in our zone of responsibility was continued.

b. BLT 128.

BLT dispatched four (4) motorized patrols at about 0830. The patrols consisted of one (1) officer, (2) enlisted men, and one (1) interpreter. The mission of these patrols was to reconnoiter listed intelligence targets and develop new intelligence targets in the zone of the respective patrols. The patrols were under the command of the following officers:

Patrol #1	Reconnaissance of underground airplane assembly plant in the Wajiro Area.	1stLt. R. Kuffel
Patrol #2	Road reconnaissance of the Futsukaichi-Dazaifu-Umi Area.	2ndLt. E.D.H. Friend

a. Headquarters Detachment:

Japanese guarding weapons at the Kempei-Tai Headquarters were relieved, and a marine guard substituted for them. A report on billeting facilities in the MOJI area was received from Major Winstead. A report on the KYUSHU-HONSHU vehicular tunnel made by the 5201st Engineer Brigade was forwarded to CG VAC. A motorized patrol was sent

CONFIDENTIAL

APPENDIX NUMBER 1 TO ANNEX DOG TO FOFL FBC OPERATIONS REPORT

through our zone of responsibility to inspect Japanese guards posted on installations not yet taken over by us. Patrols in the FUKUOKA city area with the mission of continuing surveillance over installations and public buildings were continued. SOG was ordered to help Lt. Col Glassburn of the 32nd Infantry Division locate suitable billets in the SHIMONOSEKI Area and to relieve the special details on duty in MOJI and SHIMONOSEKI. Trains serials one, two, and three arrived at Kashii Station at 1130, 1430, and 1715 respectively. They all carried elements of 228 and the headquarters of CT 28. Serial three carried elements of attached units CT 28 in addition. One OY plane, piloted by Lt. Collins, reported to this Headquarters for operational control at 1600.

b. CT 28:

Elements of CT 28 arrived Kashii Station as indicated in paragraph (a) above. Their CP opened at 1330 at East Park, FUKUOKA (46.9-68.4).

c. SHIMONOSEKI Occupation Group:

SOG announced telephone communications with this Headquarters at 1845, 4 October. Billeting of troops was continued. A marine guard was placed at ODZUKE Airport near SHIMONOSEKI, and guards were placed on the major public buildings in the city proper. Two patrols were sent out to reconnoiter roads and inspect warehouses where Japanese weapons are stored.

d. BLT 1/28 (Reinf):

BLT dispatched four (4) motorized patrols at about 0830. The patrols consisted of one (1) officer, two (2) enlisted men, and one (1) interpreter. The mission of these patrols was to reconnoiter listed Intelligence Targets and develop new Intelligence Targets in the zones of the respective patrols. BLT 128 displaced to KYUSHU Airplane School (48.9-74.0) and the CP opened at 1330.

4. Casualties:

None.

- (a) FUKUOKA. No rain, fair, wind 3 to 5 knots NE, visibility 5 to 8 miles. Sea calm.
- (b) SHIMONOSEKI. Cloudy and overcast but no rain. Wind 2 knots easterly. Visibility 5 miles. Sea calm.

3. Our Operations for the Period:

- a. Headquarters.
This headquarters ordered BLT-128 to revert to CT-28 at 0800. This headquarters continued patrols and surveillance over Japanese public buildings and installations in the city of FUKUOKA. CT-28 was ordered to post American guards at three Chinese POW and labor camps at IIZUKA at 1500. The guard detail consisted of 1 officer, 4 NCO's and 27 enlisted from 128.
- b. CT-28.
BLT 128 continued organization of new billeting areas. BLT 128 continued billeting and took over the supervision of the movement of Japanese material in the Kashii Station to centralized warehouses.
- c. SOG.
Patrols were sent out to inspect military installations, warehouses and intelligence targets of both civil and military nature. CO, SOG held a conference with Japanese authorities to discuss the progress of demobilization in the SHIMONOSEKI-MOJI area. In MOJI, "I" Co, 28th Mar placed marine guards over government buildings, the railway station, and important street intersections.

1. Location Of Troops:

See Location Statement No. 10.

2. Weather and Visibility:

- (a) FUKUOKA: Heavy overcast all day, heavy rain in afternoon with 15-20 knot variable wind. Visibility one mile, sea choppy.
- (b) SHIMONOSEKI-MOJI: Same except wind 10-15 knots.

3. Our Operations for the Period:

a. Headquarters:

The second OY plane ordered to the Headquarters reported at 1000, at which time we assumed operational control. The Headquarters continued the execution of the assigned mission.

b. CT 28.

The Detachment guarding Chinese POW and Labor Camps was augmented by one platoon from BLT 128. This platoon was dispatched at 1500, and was ordered to operate in NOGATA (1378-1186), ORIO (1375-1202) and GOTOJI (1386-1173). (See map reference (a)). The total number of camps now guarded is ten. A detachment was dispatched at 1605 to guard a Japanese experimental plane of high intelligence value, located three (3) miles south of ITAZUKE.

In addition to the above, the CT dispatched a total of six (6) motorized patrols to continue execution of the Force mission.

c. SHIMONOSEKI-MOJI Occupation Group:

A patrol was sent out to report on ferry, barge and landing craft facilities for crossing the Straits of SHIMONOSEKI. The patrol reported that there are no barges available, and that the ferry, due to its doors being only six (6) feet high can only transport four (4) jeeps. Its capacity is

CONFIDENTIAL

3. Our Operations for the Period:

a. Headquarters:

The balance of BLT 328 departed from FUKUOKA by road at 0715 and rail at 0950 arriving at MOJI at 1000 and 1245. BLT 328 is now entirely in the SHIMONOSEKI-MOJI area, and the CO of BLT 328 has been designated as CO, SMOG. The Headquarters

CONFIDENTIAL

APPENDIX NUMBER 1 TO ANNEX DOG TO FOF-FBC OPERATIONS REPORT

continued inventorying Japanese supplies at dump located in the FUKUOKA city area. Headquarters continued execution of the assigned missions.

b. CT28.

A special guard was placed on a Japanese plane found 3 miles south of ITAZUKE airfield pending inspection by technicians. Another detail was sent to FUTSUKAICHI (1357-1155) to assist in the search for Japanese Western Army CP reported there. This detail was secured at 1600. A full report of this mission will be found in Intelligence Report #11. One officer and 12 men were dispatched as a guard over a Chinese POW-Labor Camp located near UMI (1356-1164). This makes a total of 11 such camps now placed under surveillance of guards from this force.

A total of 6 motorized patrols were sent out in execution of the Force mission.

c. SHIMONOSEKI-MOJI Occupation Group:

Billeting of the elements of BLT 328 which arrived in the area was commenced. Patrols were sent out in execution of the Force mission in that area. CO, SMOG conducted meetings with the Mayor of MOJI and other authorities in that city.

3. Our Operations for the Period:

(a) Headquarters.

This Headquarters issued Operations Order No. 5-45 relative to the extension of operations and assignment of zones of responsibility to CT-28, the MOJI Occupation Group, and the YAMAGUCHI Detachment. Physical inventory of Japanese material and the movement of materiel to a centralized location was continued by the Inventory Teams. Motorized patrols in execution of the Force mission were continued.

(b) CT-28.

The headquarters group continued routine patrolling. BLT 128 sent out 4 motorized patrols, 2 of which inspected intelligence targets and 2 made reconnaissance of roads, billeting areas and outlying installations. BLT 228 sent out 3 patrols to inspect intelligence targets. It also placed a guard of 13 men over the Kasuge Weapons Factory and a guard of 18 men over the Kyushu Aircraft Manufacturing Plant. Both of these plants are located 5 miles southeast of FUKUOKA city.

(c) SHIMONOSEKI-MOJI Occupation Group:

In SHIMONOSEKI 3 patrols were dispatched, the first to inspect intelligence targets, the second to make a road reconnaissance toward SENZAKI and the third to inventory Japanese weapons.

In MOJI 3 patrols were dispatched in execution of the Force mission. A meeting with Japanese naval authorities was held to plan the investigation of Japanese harbor defences in the MOJI area.

3. Our Operations for Period:

(a) Headquarters.

D Co., 3rd MP Bn (Prov) arrived by rail at 1415. The Inventory teams continued the physical inventory of Japanese materiel and supervised its movement to centralized locations. Patrols in execution of the mission were sent out. Meetings were held to discuss preliminary arrangements for being relieved by the 32nd Infantry Division.

(b) CT-28.

CT-28 supervised the debarkation of Japanese troops arriving from Korea. The KOGANE MARU debarked 1132 troops, the KAINETI MARU 792, and the hospital ship ARIMASAN MARU 1275 people, of whom 980 were army, 211 hospital personnel, and the remainder civilian. Personnel were examined medically by Japanese doctors, and those sick were dispatched by train to hospitals

CONFIDENTIAL

APPENDIX NUMBER 1 TO ANNEX DOG TO FOF-FBC OPERATIONS REPORT

as soon as possible. CIC screened incoming personnel. BLT 128 sent out 4 patrols, 2 on reconnaissance and 2 on sentry inspection duty and BLT 228 dispatched 3 reconnaissance patrols.

c. MOJI Occupation Group

Three patrols in execution of the assigned mission were dispatched. The patrol sent to inspect Japanese craft used as harbor defences reports these vessels stripped of weapons and ammunition.

d. YAMAGUCHI Detachment.

Two YAMAGUCHI meetings with Japanese officials relative to demobilization, return of Koreans, and transportation were held. The rail and road facilities to SENZAKI were reported impassable due to the damage caused by heavy weather.

In SHIMONOSEKI patrols in execution of the Force missions were continued.

3. Our Operations for the Period:

a. Headquarters:

This Headquarters made arrangements to assist elements of the 32nd Infantry Division in movement into the FOF zone, and continue the preparation of their billeting areas. The first train serial carrying 1/28 arrived in SHIMONOSEKI at 1530. The report of the CO of the YAMAGUCHI Detachment on the port of SENZAKI was forwarded to VAC. Briefly, facilities for unloading at SENZAKI are limited and poor, as unloading must be done by lighter in the stream. Winter weather

CONFIDENTIAL

APPENDIX NUMBER 1 TO ANNEX DOG TO FOF-FBC OPERATIONS REPORT

will make the operation even more difficult within the month. The Headquarters continued routine patrolling and the inventory and centralized storage of Japanese materiel. Patrols were dispatched to all prisons in the FOF area at 1600.

b. CT28.

The Headquarters sent a billeting party to KURUME at 0800. Reception and inspection of incoming Japanese military and civilian personnel was continued. Three patrols investigating intelligence targets were dispatched, and four on prison inspection duty as mentioned above. A guard was placed on the VAC radio relay station at ABURA YAMA (41.5-57.3).

c. MOG.

Preparations were made to inventory KOKURA Arsenal. Inventory of Naval warehouses in the MOJI dock area was continued. An investigation as to supplies of narcotics was made. Civil authorities provided a list of stores selling narcotics for medical purposes, and stated that there were no supplies of narcotics in military dumps.

d. YAMAGUCHI Detachment.

The CP was moved to the Aviation School in YAMAGUCHI city. All Naval personnel in the SENZAKI area are demobilized except a detail of 10 officers and 60 men engaged in minesweeping. The Detachment continued execution of their assigned mission.

No. 19

From: 1800/I 17 October, 1945.

To : 1800/I 18 October, 1945.

Maps: No change.

1. Location of Troops:

See Location Statement No. 19.

2. Weather and Visibility:

- (a) FUKUOKA. Light overcast and light rain, visibility 3-5 miles, wind North 3-5 knots, sea calm.
- (b) MOJI. Overcast with intermittent rains, visibility 2-4 miles, wind North 8-10 knots, sea calm.
- (c) YAMAGUCHI. Same as MOJI.

3. Our Operations for the Period:

a. Headquarters.

Headquarters assisted the movement of elements of the 128th Infantry into SHIMONOSEKI and continued preparations for being relieved by the 32nd Infantry Division. The last two train serials carrying elements of 2/128 arrived in SHIMONOSEKI at 171830/I and 172320/I respectively. As of 171830/I all vehicles of 1/128 and 2//28 had been moved across the Straits into SHIMONOSEKI. Inventory Teams continued the inventory and centralized storage of Japanese materiel.

b. CT-28.

The CT-28 Inspection Team continued to check all Japanese nationals arriving at FUKUOKA from ports outside the home islands. The investigations of NAMAZNDA, NIGHI MACHI, and HOJYO prisons were

CONFIDENTIAL

APPENDIX NUMBER 1 TO ANNEX DOG TO FOF-FBC OPERATIONS REPORT

continued. Five motorized patrols were sent out to continue inspection of sentries and intelligence targets as listed by G-2.

c. MOG.

Controlled items at KOKURA Arsenal and JONO Branch of KOKURA Military Ordnance Depot were collected. Civil authorities in MOJI were instructed as to the collection of weapons from civilians in accordance with SCAP directives. The investigation of prisons in YAMAGUCHI KEN was continued. Patrols continued surveillance.

d. YAMAGUCHI Detachment.

The CO YAMAGUCHI Detachment continued meetings with officials of YAMAGUCHI KEN on the Korean problem. Meetings were held with medical officers from SCAP Headquarters on sanitation and public health. Investigation of TOKYAMA and IWAKUNI prisons and patrol surveillance was continued.

4. Casualties:

None.

To : 1800/I 19 October, 1945.

Maps: No change

1. Location of Troops:

-3L-

CONFIDENTIAL

CONFIDENTIAL

APPENDIX NUMBER 1 TO ANNEX DOG TO FOF-FBC OPERATIONS REPORT

See Location Statement No. 20.

2. Weather and Visibility:

- (a) FUKUOKA: Light overcast and light showers in morning, clear in afternoon, visibility 10-15 miles, wind 2-3 knots North, sea calm.
- (b) MOJI: Scattered clouds, no rain, visibility 15-20 miles, wind 5-7 knots NW, sea calm.
- (c) YAMAGUCHI: Overcast, no wind, visibility 10-12 miles.

3. Our Operations for the Period:

a. Headquarters.

Headquarters continued the inventory and centralized storage of Japanese materiel. The relief of the YAMAGUCHI Detachment in the SHIMONOSEKI Area by the 128th Infantry was effected at 190900/I. The 3rd Bn 128th Infantry continued to move into the YAMAGUCHI KEN. A detachment of D company, 3rd MP Bn (Prov), consisting of two (2) officers and forty (40) men, was dispatched from SHIMONOSEKI by rail at 191300/I and reached SENZAKI at 191600/I and began supervision of incoming Japanese Nationals. Preparations for the relief of the FOF by the 32nd Infantry Division continued. Patrols were continued to maintain surveillance.

b. CT-28.

The Inspection Team continued to check Japanese Nationals arriving at FUKUOKA from outside the home islands. The investigation of NAMAZNDA, HOJYO, and NICHI-MACHI prisons, and the interrogation of prisoners, was continued. At 182115, a platoon was sent to a Chinese POW Camp called TAKAO, located in IIZUKA at the request of the Marine Guard there. The platoon wired back at 182330 that the anticipated trouble had not occurred, but that the guard on the camp had been strengthened, and the Chinese in the IIZUKA Area restricted to their camps. In addition four (4)

CONFIDENTIAL

APPENDIX NUMBER 1 TO ANNEX DOG TO FOF-FEC OPERATIONS REPORT

motorized patrols were dispatched, three (3) on road reconnaissance missions, and one (1) on country inspection duty.

c. MOG.

The inventory of KOKURA Arsenal was completed. Work in the KOKURA and WAKAMATSU prison was completed, and the details there secured at 1000 and 1200 respectively. However, the detail at WAKAMATSU remained in that town at the request of the local civil police, who asserted that they had been having trouble with Chinese in the locality. The detail investigated at Police Headquarters, and has reported no incidents. "K" Company rejoined BLT 328 from SHIMONOSEKI at 191230/I.

d. YAMAGUCHI Detachment.

The detachment reported the demilitarization of the Kempei-Tai, except for a small number remaining to assist in handling returning Japanese troops. The patrols inspecting the TOKYAMA and IWAKUNI prisons returned at 191345/I. The detachment completed arrangements for being completely relieved by the 128th Infantry at 200900/I.

4. Casualties:

2. Weather and Visibility:

- (a) FUKUOKA - heavy overcast, intermittent rain, visibility 2 miles, wind 1-2 knots variable, sea calm.
- (b) MOJI - overcast, intermittent rain, visibility 6-8 miles, wind 5-6 knots NW, sea calm.
- (c) YAMAGUCHI - cloudy, occasional showers, no wind.

3. Our Operations for the Period:

a. Headquarters:

The YAMAGUCHI Detachment was relieved by the 128th Infantry at 200900/I, and the personnel of the Detachment arrived at SHIMONOSEKI by train at 201515/I and were rejoined to BLT 328. The 129th FA arrived at MOJI at 192400/I, and set up a CP at the MOJI Club (58'25"-55'-90"). The 3rd Bn, 128th Infantry arrived at YAMAGUCHI City via train at 191800/I and 192030/I. CP of the 3rd Bn is located at (644.8-238.95). FOF Headquarters continued inventory and centralized storage of Jap materiel. Plans for the relief of FOF by the 32nd Infantry Division were discussed. Surveillance was maintained.

b. CT-28:

The Inspection Team continued to check Japanese Nationals arriving from ports outside the home islands. The investigation of NICHI-MACHI prison at IIZUKA was completed, and the detail returned to camp at 201500/I. Investigation of NAMAZNDA

CONFIDENTIAL

APPENDIX NUMBER 1 TO ANNEX DOG TO FOF-FBC OPERATIONS REPORT

and HOJYO prisons are still being carried on. Six (6) patrols were dispatched to investigate intelligence targets in CT-28 zone.

c. MOG:

At 200900/I a detachment consisting of one (1) officer and twelve (12) men was dispatched to KOKURA at the request of Japanese civil authorities to assist in maintaining law and order. The Japanese had feared trouble with local Chinese. The detail was sent as a precautionary measure and has reported no incidents. No incidents have been reported from WAKAMATSU. MOG also dispatched four (4) patrols investigating intelligence targets.

d. 128th Infantry:

The 128th Infantry continued billeting and took over the guard and patrol posts held by the Marines in YAMAGUCHI Ken.

4. Casualties:

None.

2. Weather and Visibility:

(a) FUKUOKA. Partial overcast, no rain, visibility 6-10 miles, wind 10-15 knots N, sea calm at end of period.

(b) MOJI. Broken to overcast, visibility 6-10 miles, wind 10-15 knots NW, sea calm.

3. Our Operations for the Period:

a. Headquarters.

CONFIDENTIAL

APPENDIX NUMBER 1 TO ANNEX DOG TO FOF-FBC OPERATIONS REPORT

Headquarters continued routine patrols in FUKUOKA. The inventories of Japanese materiel, and the records of the Inventory Teams were turned over to G-4, 32nd Infantry Division, at 231100/I. Two barge loads of Japanese small arms ammunition were ready for dumping at sea, but choppy seas prevented their being towed out. Preparations for the relieve of FOF by the 32nd Infantry Division were continued.

b. CT-28.

Inspection of Japanese arriving at HAKATA from ports outside the home islands were continued. Routine patrol activities were continued.

c. 129th FA Bn (MOJI).

The battalion dispatched four motorized patrols to investigate four industrial plants in their zone. The battalion continued routine patrols and guards.

d. 128th Infantry.

The reconnaissance patrol sent to BOFU reported an excellent billeting area for a battalion at the Japanese Naval Training Station. It is the intent of the 128th Infantry to move their 2nd Battalion there on 26 October. Inventory of the 8063 AA Unit was continued. Motorized patrols were sent to HAGI and KUSHIGAHAMA (680-1219) (Map VAC Occupational Zone), 25 miles SE of YAMAGUCHI to investigate military intelligence targets there. Headquarters and Dog Co of the 107th Medical Bn closed YAMAGUCHI at 230130/I.

CONFIDENTIAL

25 November, 1945

Annex EASY to FOF-FBC Operations Report.

G-4 REPORT

Map: A.S. L872, KYUSHU, scale 1:25,000.

1. PLANNING.

G-4 planning for the occupation of the FUKUOKA-SHIMONOSEKI area was initiated on 27 September, 1945, and consisted of daily conferences with members of the staff of V Amphibious Corps on such matters as amounts of supplies to be carried, arrangements for transportation, and plans for resupply. These details, as finally determined, were as set forth in VAC Administrative Order 10-45. The 1st Bn, 28th Marines, was designated as the Supply Agency of the FUKUOKA Occupation Force. An advance party made up of VAC and 5th Mar Div representatives, was established in FUKUOKA during the planning stage. This advance party selected and procured billet areas for the FOF.

2. MOVEMENT TO OBJECTIVE AREA.

At 0700 on 29 September an Advance Detail from BLT 1/28 proceeded to FUKUOKA by motor convoy for the purpose of cleaning and spraying with DDT those buildings selected for billeting.

On 30 September the main body of FOF proceeded to FUKUOKA via rail and motor convoy. Poor conditions of roads and bridges necessitated the limiting of loads on 2½-ton trucks to 1-ton cargo. These conditions were later improved so that heavy vehicular traffic between SASEBO and FUKUOKA was possible.

Initial movement of the FOF was completed on 1 October by combined rail and motor convoy movement.

During the remaining period covered by this report units were moved to the FUKUOKA area by both rail and truck convoy, but these movements were controlled by higher echelon.

CONFIDENTIAL

Annex EASY to FOF-FPC Operations Report. (Cont'd)

3. G-4 OCCUPATIONAL FUNCTIONS.

a. Supply, Equipment and Installations.

Mounting-out supplies, as supplemented by units arriving from time to time, were entirely adequate, except in the case of DDT and cleaning materials. It was necessary to request resupply of these items on at least two (2) occasions. These requests were filled immediately. Similarly, mounting-out equipment was generally adequate. An initial shortage of field ranges and other similar housekeeping equipment was quickly rectified by parent organizations and no particular hardships were encountered.

Troops subsisted on emergency rations until messes and galleys were properly screened. The dates of completion of this work varied, but by 8 October all were satisfactory. Initially "B" rations were poorly balanced; however, this fact had been known prior to departure from the Hawaiian area and was unavoidable. The condition was corrected by early resupply shipments.

The KASHII railhead (1349.5-1173.5) where FOF troops were billeted was a very good supply installation location. Warehouses in this area were well constructed, with concrete decks and wide, high doors and good roofs. Once cleared of Japanese materiel, the number of warehouses (90) was adequate for billeting all Quartermaster troops scheduled to arrive and for all base-supply covered storage requirements. It was necessary to improve most of the other facilities in the area, including roads, water supply, lighting and hardstands. This work was initiated immediately and continued throughout the period covered by this report. As in all cases mentioned herein which required manual labor, Japanese civilians were utilized to the fullest extent. Their efforts were directed by engineer personnel of Co. "C", 5th Engr Bn; 5201st Engr Const Bn; and 1688th Engr C Bn; these units also furnished engineering equipment.

An Ordnance Center was established at ZASSI ONOHUNA (1353.1-1161.1) on 31 October. As in the case of the KASHII railhead, the area was well adapted to development for this type of use. Adequate billeting space, shop buildings, open and covered storage, and truck parks were present. Ordnance service units assigned were adequate for the ordnance mission; however, the readjustment program resulted in a high percentage of infantry replacements in lieu of technical personnel. The preceding remark may be applied to all service units in addition to ordnance.

CONFIDENTIAL

Annex EASY to FOF-FBC Operations Report (Cont'd)

The operating supply agency for the FOF changed three times. From 27 September until 7 October, BLT 1/28 was charged with this responsibility. From 7 October until 13 October, CT 28 was the operating agency. Thereafter Army service units assumed responsibility for overall supply.

Engineer supply was entirely handled by the 5201st Engr Const Brigade and was never a function of the FOF or the FBC.

While it was never possible to attain the prescribed stock levels during the period covered by this report, only two serious supply shortages were noted. These were winter clothing and stoves for Army units. While these shortages occasioned some discomfort, it is considered that the delay was unavoidable. The almost continuous utilization of railroad facilities for movement of troops and organizational equipment was the determining factor in preventing a build-up of stock levels. Once all units were firmly established, no difficulty should exist in maintaining the area by rail shipment from SASEBO. Motor convoys were used to supplement rail transportation during critical periods.

Resupply of units for which FOF and FBC were responsible was accomplished by rail shipment to units in the NOJI-SHIMONOSEKI area and by railhead or unit distribution to all other units depending upon the availability of transportation to the unit concerned. No difficulties were encountered.

Logistic transportation assigned was adequate at all times. For the most part it was provided by Co "B", 12th Force IT Bn, and by the 284th QM Trk Co. Transportation for headquarters staff, visiting officers, patrols and inventory teams was furnished from a jeep pool operated by the 5th ASCo. Upon occasion closed passenger cars were obtained from the Japanese Liaison Committee for transporting visiting general officers.

A ten-day evacuation policy was inaugurated by Co "C" 5th Medical Bn, upon its establishment at the S. ITOSAKI Naval Air Station on 6 October. Evacuation was normally by rail to SASEBO, a special car having been converted into a hospital car with bunks and emergency medical supplies and made available on 24 October. As early as 2 October,

CONFIDENTIAL

Annex E/3Y to FOF-FBC Operations Report. (Cont'd)

however, utilization was made of the attached OY airplanes for evacuating a badly burned patient. This method of transportation was always available for emergency evacuation. On 18 October the 122nd Sta Hosp was established at NOKUR where it functioned as a fifty-bed hospital until moved to MOJI on 29 October where it was expanded to a 500-bed hospital. The 300th Gen Hosp arrived in FUKUOKA on 7 November and began preparations for establishing a general hospital. This subject is covered in more detail in the Medical Report which is appended hereto.

b. G-4 Relations With the Japanese.

The Procurement Board, Headquarters, FUKUOKA Occupation Force, was established by Force Special Order 6-45 on 3 October and functioned under the direction of this headquarters until 24 October, at which time occupational responsibility was taken over by the 32nd Inf Div. Details of operation of the Board are covered in the Procurement Report which is appended hereto.

On 3 October an investigation of local laundry and dry cleaning facilities was started. After considerable effort and the appointment of a Laundry Officer, this project was completed and limited facilities were made available to all troops in the area. Prices agreed upon were within the limits set by VAC.

On 3 October a meeting was held with Japanese officers of the Western Army Headquarters relative to the disposition of surrendered materiel. Japanese were instructed to maintain guards on all dumps until relieved by occupation forces. They were further instructed to translate into English and to deliver to this headquarters four copies of the inventories of all dumps in the area. It was explained that only personnel possessing an official pass, authenticated by the Commanding General, Chief of Staff, or G-3 were authorized to remove material from dumps.

Inventory of Japanese materiel began on 3 October and was conducted by special inventory teams, each consisting of one NCO and four other enlisted plus an interpreter. Each five teams was directed by an officer. These teams were furnished authenticated passes. Their first mission

CONFIDENTIAL

CONFIDENTIAL

Annex EASY to FOF-FBC Operations Report. (Cont'd)

was to locate, consolidate and place under our guard all "controlled items". These included swords, sabers, pistols, binoculars, field glasses and battle flags. Dumps containing these articles were located from patrol reports, Japanese inventories and by questioning Japanese officers. Items located were inventoried, receipted for to the Japanese guards, and removed to a central warehouse located at (1348.8-1173.4) where they were placed under U.S. Marine Corps guard.

The number of troops attached to FOF was insufficient to provide guards for all Japanese dumps in the zone of responsibility. Japanese guards were left on the dumps even after they had been inventoried by our teams; however, they were periodically checked by our patrols for vigilance. The inventory of all surrendered war materials was commenced on 8 October, with priority being given to dumps containing weapons and ammunition. In nearly every case the Japanese inventories for a specific dump proved correct when checked by our teams. Where shortages existed they were normally covered by a receipt signed by allied personnel. These receipts were accepted by our teams and turned over to G-2 for investigation as to their bona fide nature.

The Japanese did not give accurate and detailed locations of all dumps in the area. Many unreported dumps were found by reconnaissance patrols and inventory teams. All known dumps in the area covered by our teams were inventoried, but it is considered likely that small outlying dumps had not been located or reported when the 32nd Inf Div assumed occupational control of the area.

The area covered by FOF inventory teams is enclosed by the following coordinates: (1300.9-1150.1) (1160.0-1150.0) (1370.2-1180.5) (1360.9-1200.3).

At 0800 24 October, the FOF was disbanded and all Japanese inventories, maps and other pertinent records were turned over to the G-4 Section of the 32nd Inf Div. Thereafter, this command was not directly concerned with inventory, safeguarding or disposition of surrendered materiel.

FUKUOKA, JAPAN

NOV 25 1945

Appendix No. 1 to Annex EASY to FOF-FBC Operations Report.

MEDICAL REPORT

1. GENERAL.

The Fukuoka Occupation Force Surgeon arrived in the Fukuoka area 30 September, 1945. The personnel attached to this office were two corpsmen to help with administration. Its purpose was entirely advisory and supervisory. Medical units and personnel arriving on this date, 30 September 1945, included Company "C" Medical Battalion, Fifth Marine Division and Battalion Surgeon, First Battalion, 28th Marines with his corpsmen. They were all billeted at KASHII.

The immediate medical - sanitary problems to be met upon arriving in the Fukuoka area were the establishment of Sickbays, Dispensaries and Prophylactic stations with assignment of corpsmen and doctors drawn from the above units. A Sick-call station, including a ten bed dispensary ward, was immediately established at the First Battalion, 28th Marines, Headquarters located at Kashii. Two days later a second Sickbay was set-up in the Gymnasium in East Park where the Fukuoka Occupation Force Headquarters troops were billeted. A third Dispensary and Prophylactic station was established on the 2nd floor of the Kyoshintei Hotel in Fukuoka City on 3 October 1945. Marine patrols reported hospital sites and buildings which were then inspected and passed-on by the Fukuoka Occupation Force Surgeon for the permanent location of Company "C" Medical Battalion, 5th Marine Division Hospital. On 5 October, 1945, this hospital unit was moved into the former Japanese fifty bed hospital located at Saitosaki Naval Air Station. They began receiving patients the following day. Battalion Surgeon and Corpsmen, Second Battalion, 28th Marines, 5th Marine Division arrived in Fukuoka area 5 October, 1945 and established their headquarters in the area (Kashii) vacated by the First Battalion, 28th Marines, who were now located in the former Industrial School.

a. Water and Rations. Water was not an immediate problem, for the quartermaster had on hand enough purified drinking water for all troops for a five day period. Shortly after the arrival on 5 October 1945 of two portable water purification units, a water point was operating using the

CONFIDENTIAL

Appendix No. 1 to Annex EASY to FOF-FBC Operations Report
(Cont'd)

units in tandem, at the permanent site of Headquarters First Battalion, 28th Marines, which continued to supply adequate bacteria-free water. Bacteriological tests were made daily by the medical laboratory functioning with the hospital. For bathing and washing purposes, the city water supply was used freely. This contained no amoebic cysts, Protozoa or Cerciariae according to bacteriological tests. It did contain many Coliform group bacteria which made it unsuitable for drinking purposes. "K", "C" "P" and later "A" rations were available in sufficient quantity throughout the occupation.

b. Quarters. All troops were adequately billeted in barracks which were dry and only warm because the weather was warm. No heating units were available in any of the billets. Heads were troublesome, practically all in troop billets could not be used. Heads had to be dug.

Staff Officer personnel were assigned quarters in the Hakata Hotel, Kyoshintei Hotel and Headquarters building, Fukuoka Occupation Force. Enlisted personnel of Fukuoka Occupation Force Headquarters were billeted in the Gymnasium in East Park, near Headquarters. The First Battalion, 28th Marines was billeted in the former Japanese two story barracks at (49.0-74.0). The Second Battalion, 28th Marines were assigned to barracks at Kashii railhead area. The Third Battalion, 28th Marines, were assigned to barracks in Shimonoseki, Noji, and Yamaguchi.

The Regimental Surgeon, 28th Marines, arrived on 6 October 1945. Regimental Headquarters, 28th Marines, was located in Fukuoka Occupation Force Headquarters building. The Regimental Surgeon had available medical personnel from the Battalion Surgeons of the 2nd and 3rd Battalions, 28th Marines. An additional Sickbay was opened at the railhead at Kashii where the Headquarters of the 2nd Battalion, 28th Marines was located. Our most urgent supplies needed in the area became Prophylactic sets and DDT.

c. Insect Control. Fleas, lice, mosquitos and flies were never a problem in these areas, mainly because of the DDT spray-control.

All buildings occupied by the Fukuoka Occupation Force and attached units were thoroughly sprayed by an advance party from the Epidemiological Unit, 5th Marine Division. Subsequent DDT spraying of newly acquired buildings

CONFIDENTIAL

Appendix No. 1 to Annex EASY to FOF-FBC Operations Report
(Cont'd)

and respraying of those previously acquired was done by an eleven man team using only hand sprayers and portable pressure models. A mixture of five percent DDT in kerosene was used exclusively. DDT was difficult to obtain but sufficient supply was made available to meet existing needs.

d. Miscellaneous. Inventories were made of Japanese Medical dumps found at three separate locations. In the Seinan-Gakuin High School, located at (41.1-66.1), large quantities of an intravenous pharmaceutical preparation were found. Tataramura Village office located in Tataramura area, contained a large supply of powdered quinine. In the Doi Warehouse at Tataramura, Hakozaki, was found a large group of supplies and medicines. None of these medicines were suitable for use by our Armed Services. This inventory was completed on 6 October 1945.

On 8 October 1945 a Force Order 4-45 was issued on the subject of "Personal Hygiene and Sanitation for troops in the area". This warned against eating Japanese food, drinking water other than that obtained from our water point and it located our Pro-First Aid Stations in the Fukuoka area. The Prostitution problem was investigated early in the occupation of Fukuoka with the Provost Marshal. Venereal units were set-up with personnel drawn from the medical units available in this area, but they never functioned since houses of prostitution were declared "out of bounds", before general liberty began for the troops.

An "Ambulance Watch" was established with telephone service to all Aid-Stations, Surgeon's office and the hospital. This facilitated movement of the sick from the various areas in Fukuoka City to the hospital located at Saitosaki. Evacuation of the sick from this area was arranged by the transfer of patients by train to Sasebo. Early in the occupation, 2 October, 1945, an officer was evacuated by plane (OY) to Sasebo for treatment of extensive gasoline burns.

By 8 October 1945 the various troop mess and galley facilities were properly screened. The equipment available at this time to cleanse mess gear met sanitary requirements. Japanese personnel were used freely in the hotels and Headquarters building as food handlers. On 10 October 1945, all

CONFIDENTIAL

Appendix No. 1 to Annex EASY to FOF-FBC Operations Report
(Cont'd)

Japanese food handlers were taken to the Imperial University Medical School where complete Physical examinations, chest X-Rays and stool cultures were carried out using our Medical Officers and the University facilities. Those food handlers not passing this examination were removed from their jobs.

2. QUARANTINE.

As early as 5 October 1945 the port area was inspected with the thought of instituting a quarantine. Koreans were massing on the docks and the adjacent areas where they were attempting to live while awaiting transportation to Korea. There was no sanitary disposal of refuse, excreta or garbage. The fly and rat population was tremendously high. No system of medical examination or delousing of incoming or embarking repatriates was in operation. On 11 October 1945, a memorandum was sent to the Chief of Staff which was a survey on the medical problems of repatriated civilians and the homeward bound demobilized Japanese troops. The Japanese Army was, at this time, issuing new, clean clothing and bathing the demobilized soldiers before embarkation in Korea. Obvious sick Army personnel were hospitalized and placed aboard hospital ships which were met by Japanese Army ambulances at Fukuoka. These carried their patients to Japanese Army hospitals in Fukuoka Prefecture. Of the sick Japanese Army personnel returning to Fukuoka area Tuberculosis, Dysentery, Typhoid, Diphtheria, Pneumonia, Malaria, and Battle injuries were the most common diseases encountered.

On 10 October 1945, information was received from Lt. Col. Abe of Western Army Headquarters, that he was in receipt of an order from General MacArthur's Headquarters which required the Japanese to establish a system of quarantine and that Fukuoka was one of the ports involved in the order. On this date, V Amphibious Corps' confidential dispatch by G-3 Section arrived which stated, "AT Hakata (Fukuoka) supervise Nip military and civil authorities to resume proper quarantine inspection, including delousing all returning Japanese Troops being repatriated".

On 11 October 1945 steps were taken to establish a quarantine of this area without detention of repatriates at the docks. Those obviously sick were sent to hospitals in this area. Medical personnel consisted of one Japanese

CONFIDENTIAL

CONFIDENTIAL

Appendix No. 1 to Annex EASY to FOF-FBC Operations Report
(Cont'd)

Army doctor with assistants, a civilian doctor from the Public Hygienic Laboratories with assistants and a U.S. Navy doctor to supervise the carrying out of this program. Ambulances were available to carry the sick to their respective hospitals. All debarking personnel were filed before this group of examiners. Ships containing medical personnel presented a roster of their sick patients with diagnosis.

On 17 October 1945 Lt. Col. F. E. Miles (IC) S.A., Army Quarantine Liaison Officer, W.D. Chief Surgeon, G.H.Q., AF-PAC., visited this area to comment on repatriation movement of Japanese and Korean personnel. He recommended delousing of Japanese repatriates and listed Quartermaster Item Numbers of pertinent supplies:

Outfit delousing, gasoline engine-driven	No. 40-O-800
Duster, insect powder, plunger type (small)	No. 40-D-3750
Duster, insect powder, plunger type (large)	No. 40-D-3755
Insect powder, louse (10% DDT in Pyrophy-lite)	No. 51-I-180
Larvicide, DDT Dusting Powder (10% DDT in talc)	No. 51-L-122

These supplies have never reached this area and delousing with DDT has not as yet been effected.

The quarantine of Hakata harbor initiated by this office and subsequently taken over by the 32nd Division, has been in effective operation since 11 October 1945, and a well regimented program of examination of incoming repatriated Japanese civilians and demobilized Japanese Troops as well as embarking Koreans is being enforced. The general sanitation of the Hakata port area has improved considerably. The actual work of cleaning up this area was handled by the Prefectural office. They have assigned the Japanese working parties. Heads have been built, old ones cleaned and fencing provided for certain areas. Trash piles have been removed and burned or buried.

The over all medical plan for the returning Japanese provides for: inspection and vaccination at the port of embarkation in Korea by the XXIV Army Corps. The Hakata port facilities vaccinate the embarking Koreans. On 26 October 1945 Smallpox vaccinations and the first Typhoid

CONFIDENTIAL

Appendix No. 1 to Annex EASY to FOF-FBC Operations Report
(Cont'd)

injections were given to 2500 Koreans. Since this date the successive figures have been 5000, 2700, 5000, 2435, and 3902. These Koreans are given identification tags which facilitates giving the 2nd Typhoid injection in Korea. The first Typhoid injections were given on 30 October 1945 to debarking Japanese repatriates which numbered 2435. The following day 4002 received their second Typhoid injection. This work has been conducted by the Fukuoka Hygienic Laboratories under the direction of Dr. Sugino.

Warehouse buildings on the docks were procured for medical examinations, vaccination and quarantine administration. At the present time no returning Japanese are being held on the docks since it is not practicable to have any detention facilities in this area. Local hospitals have been assigned to accept civilians and military personnel. Dr. U. Isitashi, of the Tokyo Ministry of Health and Social Affairs, has agreed to establish a civilian reception hospital at Honakota, thirty Kilometers north of Fukuoka at Akoma railroad station. At present civilians are sent to Seiseikai Hospital and the Imperial University Hospitals in Fukuoka. Japanese demobilized troops are sent to the 1st Army and 2nd Army hospitals in Fukuoka and the Kokura Army Hospital at Kokura. The quarantine - medical examination is operated in conjunction and coordinated with the Military services in their search for excess money and contraband. These buildings and the dock area have been adequately sprayed many times with DDT, decreasing greatly the fly population. Recently a sanitary group was made available and put to work to reduce the rat problem. Pathological-bacteriological study of an occasional dead rat has disclosed no Plague bacillus in these animals. On 20 October 1945 two C-47's sprayed the city and dock area.

3. HOSPITALS

Additional medical facilities became available on 18 October 1945 which are listed below. The greater majority of these units arrived in the area without their organic equipment and were unable to operate as hospital units. Many of their personnel had been detached via the "point" system. The former Postal Savings - Post Office building became a transient billet for medical personnel attached to this command.

CONFIDENTIAL

CONFIDENTIAL

Appendix No. 1 to Annex EASY to FOF-FBC Operations Report

(Cont'd)

a. 122nd Station Hospital arrived at the Kokura Japanese Army Hospital, Kokura on 18 October 1945. It functioned here as a fifty (50) bed hospital until moved to its permanent location in Moji on 29 October 1945. The hospital is located in the Mitsui building. The Yusen building houses nurses and officers on the top three floors; The ground floor is retained for possible expansion of hospital facilities. The Customs building will billet enlisted men on the top two floors only. The hospital has five hundred beds established.

b. 76th and 83rd Malarial Control Units arrived 23 October 1945 and billeted at the Postal Savings - Post Office building in Fukuoka. Since arrival they have visited Kokura and Moji to spray buildings to be occupied by the Armed Services.

c. 25th Evacuation Hospital arrived 24 October 1945 at Kokura and occupied the Tamaya building. This unit has never been instructed to set-up and function as a hospital. It is standing by for demobilization orders.

d. 5th Medical Laboratory arrived in Fukuoka at the Postal Savings - Post Office building on 25 October 1945 and immediately set-up its laboratory on the 3rd floor of this building. On 1 November 1945 it was prepared to run water sample determinations, blood studies and other laboratory procedures.

e. 123rd Station Hospital reached Fukuoka 26 October 1945 and was billeted at the Postal Savings - Post Office building. Lt. Col. Cirlet, the commanding officer, assumed responsibility for operation of this building. This hospital is not operable because its equipment did not accompany the personnel.

f. 118th Station Hospital. A small advanced echelon of this hospital arrived on 26 October 1945 and was assigned billets at the Postal Savings - Post Office building.

g. 13th General Hospital. A small advance echelon of this hospital arrived on 29 October 1945. Rear-echelon and gear were retained at Sasebo. It was assigned billets

CONFIDENTIAL

Appendix No. 1 to Annex EASY to FOF-FBC Operations Report
(Cont'd)

at the Postal Savings - Post Office building until 7 November 1945 when it was sent north to Tamaya building, Kokura to billet with the 25th Evacuation Hospital.

h. Medical Sanitation Company arrived in Fukuoka 30 October 1945. Its billets were in separate buildings in downtown Fukuoka. It has been active in disposing of refuse from the Postal Savings - Post Office building and supervising cleaning of the dock area.

i. 24th Malarial Survey team arrived in Fukuoka area 31 October 1945 and was assigned for rations and billets to the Postal Savings - Post Office building. Since arrival it has been active in surveying the insect - pest problems of this area.

j. 11th General Dispensary arrived with gear in Fukuoka area 6 November 1945 and was assigned for temporary duty with the 5th Fighter Command at Itazuke Air Port and Zasshonokuma.

k. Veterinary Food Group. This unit reached Fukuoka area 6 November 1945 and was assigned to Postal Savings - Post Office building for rations and billets. Its immediate duties consisted of inspection of local ice cream plant, and Japanese restaurants in the area.

l. 309th General Hospital reached Fukuoka on 7 November 1945. Col. Temple, its commanding officer, assumed control of the Postal Savings - Post Office building. It had with it no medical gear. On 9 November 1945 it received word that gear would arrive in Sasebo in one week. It has been instructed to set up fifty to a hundred beds and operate as an emergency unit until sufficient medical gear can be obtained to establish a general hospital. The 5201 Engineers are in receipt of building plans for remodeling and repairing a water and heating system to meet the demands of a general hospital.

m. Company "C", Medical Battalion, 5th Marine Division hospital at Saitosaki has increased its census from zero on 5 October 1945, their first day of operation, to sixty patients. There are one hundred established beds.

CONFIDENTIAL

Appendix No. 1 to Annex EASY to FOF-FEC Operations Report
(Cont'd)

This hospital is continuing to function, but will be withdrawn shortly, since the 309th General Hospital plans to open soon with an equivalent number of beds. When the 28th Marines left this area on 4 November 1945 this hospital unit was attached to Fukuoka Base Command. A railroad car was converted by an Army engineer group into a hospital car with bunks and emergency medical supplies. This became available with personnel on 24 October 1945 for transportation of patients between the cities of Sasebo and Yamaguchi.

4. CONCLUSION

Topography of the area is that of a seaport city behind which is a large flat valley, extending southeast for approximately fifteen miles ending in mountains rising to four thousand feet altitude. The early part of the occupation found the area blanketed in rain and strong winds which subsequently changed to a dry fall season. The nights are cold, necessitating two to three blankets, the days with sunshine are moderately temperate. Recently the dust throughout the city has been heavy, but Army water units are now sprinkling the dirt streets.

Public buildings, churches and stores have been opened to Service personnel, but all private homes and houses of prostitution are out-of-bounds.

Facilities for treatment of the sick; - Sickbays, venereal disease Prophylactic stations and hospital facilities have been adequate. The venereal disease rates have been surprisingly low. Hospitalization of personnel has never gone above 1% of the troops in the area.

Living quarters have been adequate with some overcrowding but with good ventilation. At times it has been cold enough to have required heating units in the quarters but none have been available. In spite of this deficiency and with cold water showers no "Catarrhal fever" epidemic has arisen.

Drinking water was brought into the area and supplies remained sufficient until our water purification units were in operation. From this time on no shortages were apparent. Tap water from the city water mains was used for showers and washing purposes. No swimming pools or beach bathing was indulged in by the troops.

CONFIDENTIAL

Appendix No. 1 to Annex E'SY to FOF-FBC Operations Report
(Cont'd)

Sanitation of food storage space was not a problem since only "K", "10-in-1", "C" and finally "B" rations were issued. Recently "A" rations have been made available. Mess halls and galleys have been properly screened and treated for the elimination of pests. Troops were not permitted to eat Japanese fresh milk or ice cream. All Japanese vegetables and food stuffs have been banned from our messes. Garbage and refuse is hauled away from messing areas by Japanese personnel. Dysentery has not been endemic, no troops have been hospitalized with this disease.

Winter clothing was not available soon enough after the cold weather blanketed this area. When it arrived it was adequate. Laundry and dry cleaning facilities were available, all operated by Japanese enterprises in Fukuoka city under Armed Service contract.

Fungus infections in our personnel have not been a problem. In spite of all the Japanese civilians having "head colds" and a nasal discharge our troops have not suffered with an epidemic of respiratory infections. No health hazards, industrial or otherwise, have been encountered in the area.

NOV 25 1945

Appendix No. 2 to Annex EASY to FOF-FBC Operations Report.

DISPOSITION OF SURRENDERED MATERIAL
AND EQUIPMENT REPORT.

1. GENERAL.

No separate Disposition Section, as such, was established by FOF. This work was handled directly by the G-4 Section of FOF Headquarters. Talks on the subject were held with Japanese officers from Western Army Headquarters on October 3rd, 8th, 12th, 16th, 18th, and 23rd and with Japanese civilians from the Home Ministry on October 8th, 9th, 12th, 16th, and 23rd. During these meetings the Japanese were advised as to what actions were expected of them. All directives were covered in writing.

Services of both the CO, 209th Ord Bn, and the CO, 1st Plat, Bomb Disposal Co, VAC, were utilized in an advisory capacity in planning for the destruction of war materials.

2. TRANSFER OF JAPANESE MILITARY SUPPLIES AND EQUIPMENT
TO JAPANESE HOME MINISTRY.

On 8 October, Mr. Kimio Numata was contacted in order to obtain the information requested in VAC dispatch 051607 as to the designated official agents of the Home Ministry in NAGASAKI, SASEBO, SHIMONOSEKI and MOJI. This information was received from Mr. Numata and transmitted to VAC on 9 October.

The first actual disposition mission was completed on 12 October when forty cargo trucks were transferred to the local civilian government. These vehicles were badly needed for hauling vegetables into FUKUOKA and for other purely civilian requirements. The transfer was supervised by an officer of the Military Government Section. Receipts, signed by both parties, were received and delivered to the Procurement Section for record and forwarding. This procedure was followed in all transfers between Japanese military and Home Ministry officials.

CONFIDENTIAL

Appendix No. 2 to Annex EASY to FOF-FBC Operations report
(Cont'd)

On 13 October a directive was issued to Japanese Army and civilian officials to make preparations for the transfer of foodstuffs, clothing, medical supplies and cargo vehicles. Materials stored in the KASHII and DOI warehouse areas were assigned first priority for transfer so as to make this area available exclusively to the occupation forces. On 16 October a meeting of all interested parties was held and the work commenced on the following day, but all material transferred had not been removed on 24 October when the 32nd Inf Div assumed occupational control of the area.

3. DISPOSITION OF CLOTHING TO CHINESE.

On 18 October arrangements were made to provide approximately four thousand Chinese prisoners of war with winter clothing from Japanese Army stocks. The clothing was obtained from warehouses in the MOJI area and was delivered to the Marine detachment supervising each of the camps which the Chinese occupied. Actual delivery was accomplished on 20 and 21 October and was supervised by the Provost Marshal.

4. DISPOSITION OF INTELLIGENCE MATERIAL.

On 19 October arrangements with VAC representative of NavTecJap were made for the collection, storage and subsequent removal to SASEBO of items of Japanese equipment possessing intelligence value. This project had not been completed on 24 October so the officer-in-charge was referred to the 32nd Inf Div.

5. DUMPING OF MUNITIONS AT SEA.

On 17 October, upon receipt of verbal instructions from VAC relative to the approved method of disposing of munitions by dumping at sea, an investigation of Japanese

CONFIDENTIAL

CONFIDENTIAL

Appendix No. 2 to Annex EASY to FOF-FEC Operations report
(Cont'd)

facilities (tugs, barges, cranes, etc.) for accomplishing such disposition was made. It revealed that facilities available locally were very inadequate. A directive was issued to the Japanese Liaison Committee to take steps to secure the necessary facilities for the task. On 23 October two barges were loaded with small arms ammunition and ready to be dumped; however, the sea was too rough on that date and it was not until after the 32nd Inf Div assumed occupational control that these first barge loads were actually disposed of in this manner.

PROCUREMENT REPORT

1. GENERAL.

The Procurement Board was organized under authority of Force Special Order 6-45, on 3 October, and an office was established in FOF Headquarters at EAST PARK. As troops were moved into the MOJI and SHIMONOSEKI areas, one member of the Board was sent to each of those cities to process requests from units stationed there. These officers were given authority to negotiate with Japanese authorities in their assigned areas and to approve procurement requests. Procurement forms were forwarded to the Board in FUKUOKA for disposition or file.

2. PROCEDURE.

Procurement requests from units were received at the procurement office daily at which time they were tentatively approved or disapproved. Final action was taken at a weekly Board meeting. The senior member of the Board negotiated directly with the Japanese Liaison Committee for procurement of civilian facilities. When requests for procurement of real estate or equipment belonging to the Japanese army or navy were received, the board gave authority to take possession without negotiation. Requests for procurement of property which was considered necessary for essential civilian activities were not approved. School buildings which were actually in use for non-military education were not approved for procurement. It was necessary, however, to procure many buildings which the Japanese wished to reserve for use by Japanese repatriates in order to provide sufficient billeting space for all occupation troops.

3. AREAS AND FACILITIES PROCURED.

From the time the board was organized until 24 October 1945, one hundred and twenty-two procurement requests were approved and processed. These requests were for the following materials and facilities.

CONFIDENTIAL

Appendix No. 3 to Annex EASY to FOF-FEC Operations Report
(Cont'd)

Material or facility	Number of Requests
Buildings and Land	75
Vehicles	8
Repair of Buildings	2
Equipment and Supplies	24
Ships	3
Oil Depots	2
Road Maintenance	1
Clear Harbor	1
Tank Cars (40)	1
Repair of truck	1
Ship anchorage, construction of	1
Procurements cancelled	<u>3</u>
TOT I	122

The item, Buildings and Land, included procurements for any part of a building or for a group of buildings if they were procured as one request.

The item, Equipment, includes fuel, construction material, furniture and other items.

OFFICE OF THE SIGNAL OFFICER,
FUKUOKA BASE COMMAND,
FUKUOKA, JAPAN

CONFIDENTIAL

25 November, 1945.

From: The Signal Officer, Fukuoka Base Command.
To : The Commanding General, Fukuoka Base Command.
Subject: Signal Operations Report, Occupation of JAPAN.

1. In accordance with Corps Special Order Number 120-45, the attached report is submitted as Annex FOX, to FUKUOKA Base Command, FOF, Operations Report, Occupation of JAPAN.

H. M. Conner
H. M. CONNER

CONFIDENTIAL

375

FUKUOKA BASE COMMAND
FUKUOKA, JAPAN.

CONFIDENTIAL

25 November, 1945.

ANNEX FOX TO FOF-FBC OPERATIONS REPORT

SIGNAL COMMUNICATIONS

1. During planning and organization phases, the FUKUOKA Occupation Force was assigned communication personnel and equipment from the Signal Battalion, V Amphibious Corps. Total strength of the detachment was five (5) officers and eighty-three (83) enlisted. Signal Officer's Section, radio, wire, message center, and carrier-radio relay personnel were included.

2. Before occupational operations began, little information was known concerning Japanese commercial wire facilities among cities of Northern Kyushu and Southern Honshu. The signal plan consisted, therefore, of initially employing radio communication to link this headquarters with VAC and with subordinate units deployed throughout the zone of occupation.

3. Upon arrival on 30 September at FUKUOKA, the Signal Officer proceeded immediately to contact officials of the Japanese Department of Communications. Commercial telephone circuits between cities in the zone of occupation were operational to the following extent:

FUKUOKA	to	MOJI	7 Lines
FUKUOKA	to	SHIMONOSEKI	4 Lines
FUKUOKA	to	KOKURA	11 Lines
FUKUOKA	to	YAWATA	8 Lines
YAWATA	to	ASHIYA	2 Lines
YAWATA	to	MOJI	4 Lines
MOJI	to	KOKURA	20 Lines
MOJI	to	SHIMONOSEKI	30 Lines
MOJI	to	TOBATA	7 Lines
MOJI	to	WAKAMATSU	8 Lines

4. It became apparent that units of the FUKUOKA Occupation Force would be able to utilize Japanese commercial telephone circuits for their major communications and that radio need only be employed until Japanese lines could be procured.

CONFIDENTIAL

Annex FOX to FOF-FBC Operations Report. (Continued).

5. The FOF telephone exchange was established on 1 October. Three (3) lines from SASEBO to FUKUOKA were made direct channels to VAC. Initial procurement of Japanese commercial facilities consisted of:

FUKUOKA	to	MOJI	3 Lines
FUKUOKA	to	SHIMONOSEKI	2 Lines
MOJI	to	SHIMONOSEKI	2 Lines
FUKUOKA COMM'L	to	FOF Hd.	1 Line
SHIMONOSEKI COMM'L	to	Troop Hq (Shim)	1 Line

6. Close liaison was maintained at all times with Chief Engineer NAWAHARA of the Department of Communications, FUKUOKA. Attitude of the Japanese in making available requested circuits was, at all times, cooperative. Deadlines were met in all matters of procurement.

7. MOJI and SHIMONOSEKI telephone officials were contacted personally on 4 October. They were briefed for contact later with communication officers of occupying troops. Officials were informed of the general nature of future demands for Japanese commercial wire circuits. Visual reconnaissance of the MOJI-SHIMONOSEKI-YAWATA-KOKURA area resulted in the decision not to request nor authorize the procurement of any local wire facilities in that area, procurement to be restricted to toll-line service.

8. Company "C", 60th Signal Battalion (Special) arrived in FUKUOKA on 2 October and was placed under operational control of FOF. This unit assisted FOF signal personnel in laying lead and rubber-covered cable, Spiral-4 cable, and field wire lines in the FUKUOKA area. Cable splicers did extensive work in testing and tracing down "trouble" in existing Japanese commercial wire circuits. Work of this unit aided much in the procurement of Japanese lines by increasing the communication facilities available. A detachment from this company, on 8 October, began construction of communication lines for SHIMONOSEKI Occupation Forces. The remainder of the unit was diverted to work exclusively for the Fifth Fighter Command.

CONFIDENTIAL

Annex FOX to FOF-FBC Operations Report. (Continued).

9. Teams were dispatched to inventory Japanese Signal Equipment in the zone of occupation. Reports were forwarded to VAC. Wire equipment at the Western Japanese Army Headquarters were inspected. State of maintenance was poor. Repair for military use was impractical. New cordless switchboards and telephones were requisitioned, however, and installed for use by American forces. Quantities of Japanese cable was used in installation of wire circuits.

10. RADIO COMMUNICATION between FOF and VAC was established on 30 September. Efficiency of this circuit was impeded by the surrounding mountainous terrain and by other topographical and atmospheric irregularities. Construction of a flat-top antenna overcame transmission and reception difficulties. This station secured on 24 October.

11. The FUKUOKA Occupation Force Radio Command Net began operation on 1 October with the following stations:

- (a) FOF
- (b) 5201st Engineer Construction Brigade
- (c) 1st Battalion, 28th Marines

Communication was excellent. It was secured on 7 October when semi-permanent wire installations were completed.

12. Establishment of radio communication between this force and the MOJI Occupation Group (3rd. Battalion, 28th Marines), SHIMONOSEKI Occupation Group (3rd. Battalion, 28th Marines), and the YAMAGUCHI Occupation Detachment (3rd. Battalion, 28th Marines) was effected 2 October, 1945. Other than occasional continuous wave interferences, there were no difficulties encountered in the operation of this net. On 17 October, 1945 the net frequency was changed in an attempt to establish direct communications with "D" Company, 3rd. Military Police Battalion, located at SENZAKI, HONSHU. The distance between FUKUOKA and SENZAKI was prohibitive, however, and all messages were relayed via MOJI. This net was secured 24 October, 1945.

CONFIDENTIAL

Annex FOX to FOF-FBC Operations Report. (Continued).

13. No other radio communication was established by the Headquarters.

14. MESSAGE CENTER Operation began at 0800 on 1 October, 1945, serving the FOF CP. Daily dispatch traffic handled by the Message Center made steady increases until it averaged seventy (70) messages per 24-hour period.

15. On 24 October, 1945, the 32nd Infantry Division assumed guard for all traffic for the FUKUOKA Base Command and attached units. Following this the dispatch traffic load dropped to a 15 message-a-day average. During the operation of the FOF Message Center three systems for transmission of classified matter were used: CSP 1500, CSP 1145, and Navajo Talker.

16. CARRIER-RADIO RELAY Section began installation of its terminal station and radio relay station on 3 October, 1945. Much difficulty was encountered in moving equipment to the top of ABURA YAMA, the site of the relay station, since it was necessary to man-handle it for a distance of 1200 yards up a steep slope. Carrier communications were first established on 12 October, with two voice channels operating from Headquarters FOF to VAC. Operations were impeded initially because of radio interference within the local system. New frequencies were assigned on 15 October, resulting in satisfactory carrier telephone communications between FUKUOKA and SASEBO.

17. Teletype communications were delayed during this period because of a defective teletype and teletype relay. New equipment, furnished by VAC, permitted efficient teletype carrier communication to be established on 20 October. Intermittent trouble was experienced on the carrier system from 15 October to 1 November because of power equipment failures.

18. On 24 October, 1945 one voice channel was cut into the 32nd Infantry Division switchboard. The remaining voice channel with the teletype channel was cut into the same switchboard on 26 October. One other teletype channel was furnished that organization on 30 October.

CONFIDENTIAL

Annex FOX to FOF-FBC Operations Report. (Continued).

19. WIRE SECTION initiated installations of telephone facilities on 30 September, 1945. Street car power lines, the use of Japanese iron poles and the necessity of working in congested city streets, provided the only handicaps to installation of wire lines linking Headquarters, FOF, with units in the FUKUOKA area. Cable was used for street crossings.

20. One hundred miles of Spiral-4 cable and on hundred miles of field wire were expended in making FOF telephone installations. Five and ten pair cable was used to a lesser extent, particularly in the vicinity of switchboards.

21. Upon completion of wire installation, Headquarters FBC was linked by telephone to the following major units:

- V Amphibious Corps (Sasebo)
- 32nd Infantry Division
- 5201st Engineer Construction Brigade
- Fifth Fighter Command
- 28th Marine Regiment
- 1902nd Aviation Engineer Group
- Garrison Beach Battalion #1
- 209th Ordnance Battalion
- 3rd Military Police Battalion
- Fukuoka Commercial Switchboard

In addition 31 local telephones served the Headquarters of FBC.

22. The 32nd Infantry Division switchboard served units located MOJI, KOKURA, YAWATA, SHIMONOSEKI, AND SENZAKI area, employing lines procured by this headquarters from the Japanese.

CONFIDENTIAL

Annex FOX to FOF-FBC Operations Report. (Continued).

23. Units under control of the FUKUOKA BASE COMMAND, were linked at all times with this Headquarters via the FOF signal system. Telephone circuits were procured from the Japanese to a limit consistent with allowing certain civilian and local government lines to operate. The large volume of traffic received and emanating from the Base Command, at times overloaded the facilities but did not impede operations.
